

Saudi SALCO Contracting Company

General contracting, civil works, infrastructure and landscape,
delivering Saudi Arabia's landmark developments since 1982.

Shura Island · The Red Sea

Four decades of building the Kingdom

Saudi SALCO Contracting Company was incorporated in Jeddah in 1982. From its beginnings in external works and landscape, SALCO has grown into a multi-divisional general contractor delivering civil works, infrastructure, utilities, site development, and landscape & irrigation projects across Saudi Arabia.

Headquartered in Jeddah with branches in Riyadh, Al-Madinah and Dammam, the company employs executives, professional managers and thousands of skilled staff whose disciplines cover every aspect of its business lines, managing medium to large projects for the Kingdom's most demanding clients.

What drives our work

VISION

To be the Kingdom's contractor of choice for external works, infrastructure and landscape, trusted on the projects that define Saudi Arabia's future.

MISSION

To deliver every contract safely, on time and to specification, combining an owned equipment fleet, experienced people and disciplined project management to give our clients certainty.

Quality

A 98.25 technical assessment earned on delivered work, not promises.

Safety

Every site run to strict HSE standards, aligned with each client's own.

Commitment

Taking-over certificates achieved and handovers honoured, project after project.

Partnership

Long relationships with giga-project developers and government authorities.

One contractor, end to end

SALCO operates as a general contractor with multi-divisional capability, self-performing the works below with its own fleet and workforce.

01

General Contracting

Full contract delivery of medium to large projects nationally, from mobilisation to taking-over certificate.

02

Civil Works

General civil works and building construction, residential and non-residential, including steel structures.

03

Infrastructure & Roads

Roads, street humanization, bridges and site infrastructure, including utilities and external lighting.

04

Landscape & Irrigation

Softscape, planting and irrigation systems, the discipline SALCO was founded on in 1982.

05

Hardscape & External Works

Paving, plazas, wayfinding, bollards, signage and streetscape furniture for public realm projects.

06

Site Development

Earthworks, grading and full site development packages for resorts, districts and destinations.

07

Water & Sewage Networks

Water and sewage networks and treatment plants, including irrigation reservoirs and pumping.

08

Electromechanical Works

Electromechanical installations supporting infrastructure, utilities and landscape systems.

A portfolio on the Kingdom's giga-projects

Since 1982 SALCO has delivered landscape and public-realm works across all regions of the Kingdom, from north to south and east to west, with a track record exceeding SAR 6 billion. Today the company works on Saudi Arabia's flagship developments, with a recent portfolio stretching from the Red Sea coast to Riyadh and Al-Madinah for major developers and government development authorities. The projects below are the company's major works of the last five years.

Project	Client	Scope	Value (SAR)	Status

humanization contract**

Status

Completed · TOC issued

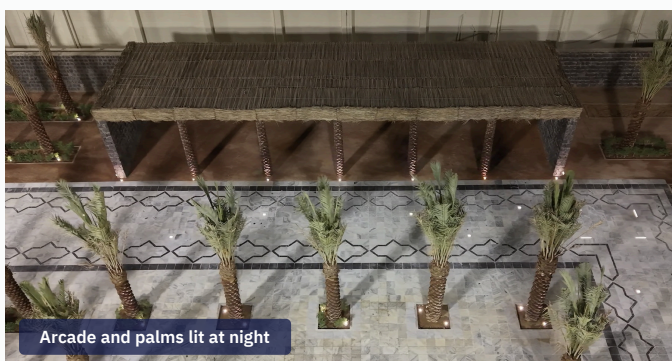

- Saqifat Bani Sa'idah is where the Ansar gathered in Rabi al-Awwal 11 AH to take counsel after the Prophet's death, peace be upon him, ending in the pledge of allegiance to Abu Bakr, and it is regarded as the first shura council convened to choose a leader.
- It lies north west of the Prophet's Mosque among the dwellings of Banu Sa'idah of the Khazraj, once set inside a farm with a wide open space before it and a well beside it. It later became a building whose form changed through the ages, and today it is a garden facing the western wall of the Prophet's Mosque.
- Development works: site preparation, removal of asphalt and the old lighting columns, new water and power networks, raised service chambers, then marble and basalt paving inlaid with star and geometric patterns and run with slot drainage.
- A shaded arcade on palm-trunk columns roofed in palm fronds, basalt masonry walls and pavilions, mature date palms set in pits cut through the paving, and raised basalt-edged beds of clipped shrubs with lighting.

BANKING PARTNERS

Self-performing on plant we own

SALCO's owned plant register runs to 1,892 machines across 88 equipment categories, from tracked excavators and 85 tonne mobile cranes to vacuum paving robots, solar tower lights and water tankers. Owning the fleet rather than renting it is what lets the company self-perform earthworks, paving, utilities and landscape packages on remote giga-project sites, mobilise to the client's programme instead of the rental market's, and keep maintenance, spares and operators in house.

Owned units	Equipment categories	Excavators	Mobile cranes
